Need and main audience

Lessons and future prospects for better-using evidence to make decisions - Thematic Working Group Evidence-to-Action
Improving access to reliable, curated information for well-informed decisions on disasters and health emergencies.

Summarising complex systematic reviews to lay writing for people across various languages.

1. Priorities
   - Implementing and coordination end-user input

2. Research
   - High-quality research that is relevant to health emergencies.

3. Reviews
   - Systematic reviews of such research provide a reliable and robust evidence base.

4. Summaries
   - Accessible summaries of this evidence to decision-makers at different levels of health emergency response and preparedness

**7 Interconnected Collections**

- **COVID-19** (585 summaries)
- **Earthquakes & Windstorms** (97 summaries)
- **Climate Change** (17 summaries)
- **Refugees & Asylum Seekers** (113 summaries)
- **Ebola** (34 summaries)
- **Malnutrition** (111 summaries)
- **Resilient Health Systems** (200 summaries)

Lessons and future prospects for better using evidence to make decisions - Thematic Working Group Evidence-to-Action
Resilient Health Systems

- **Identification**
  - Searches were run by topic (Phase 1: 5652 results, 1725 reviews screened).

- **Enhancement**
  - Collection of publication data, topic, methodology, findings, implications, and equity considerations.

- **Website**
  - Categorizing summaries, cross-linking to other collections, reference management, and embeddability.

- **Preparation**
  - Summaries drafted, edited, confirmed by PAHO, sent for translation (ENG, POR, SPA, FRE)

- **Publication**
  - 200 summaries on Resilient Health Systems published on EvidenceAid.org

---

**Phase 1 & Phase 2**

**Next Phase**

- **PAHO**
  - Expand PAHO priorities (e.g., migration, climate change). Advisory Board

- **Expansion**
  - Phase 3 of the RHS collection and its topics and broader use and communication

- **Analysis**
  - Implications for field implementation beyond what is stated in reviews, and evidence (gap)maps
